dispersion of soils
Dustjel

Dustjel

Haul road and heavy vehicle road dust control

DustJel®

DUSTJEL is a liquid Polymer high molecular weight water holding additive, added to water carts to achieve optimum performance in dust control.

Use with dust suppression water, to hold moisture in haul road running surface.

Unsealed road surfaces can be treated with DUSTJEL to provide dust control, reducing maintenance and decreasing water requirements.

Benefits

1. Performance: Applying a solution of DUSTJEL to soil decreases dust lift off by greater than 90%
2. Cost-Effective: The use of DUSTJEL
 - Dust control: Highly concentrated slam amounts will dilute a long way
 - Target rate 1 lts blend / m²
 - Daily applications in the morning with PACZYME wetting agent or target hot spot dust prone areas.
3. Target rate to reduce watering requirements between 25% and 50%

Application

Mix with water at between 1:10,000 and 1:20,000

Storage

DUSTJEL should be protected from frost and direct sunlight and kept under cover until required for use.

No special precautions are required. Containers should be kept sealed when not in use. Refer Rainstorm for Dose pump systems
